

☁ Cloud  
Computing  
– The  
Magic Toy  
Box

# What is Cloud Computing?

- Cloud computing means storing things on the internet
- Like keeping toys in a magical toy box 🧸
- You can open it anywhere, anytime!

# How Does the Cloud Work?

- The cloud is a big computer in special buildings

- Called data centers 

- It stores photos, videos, and homework

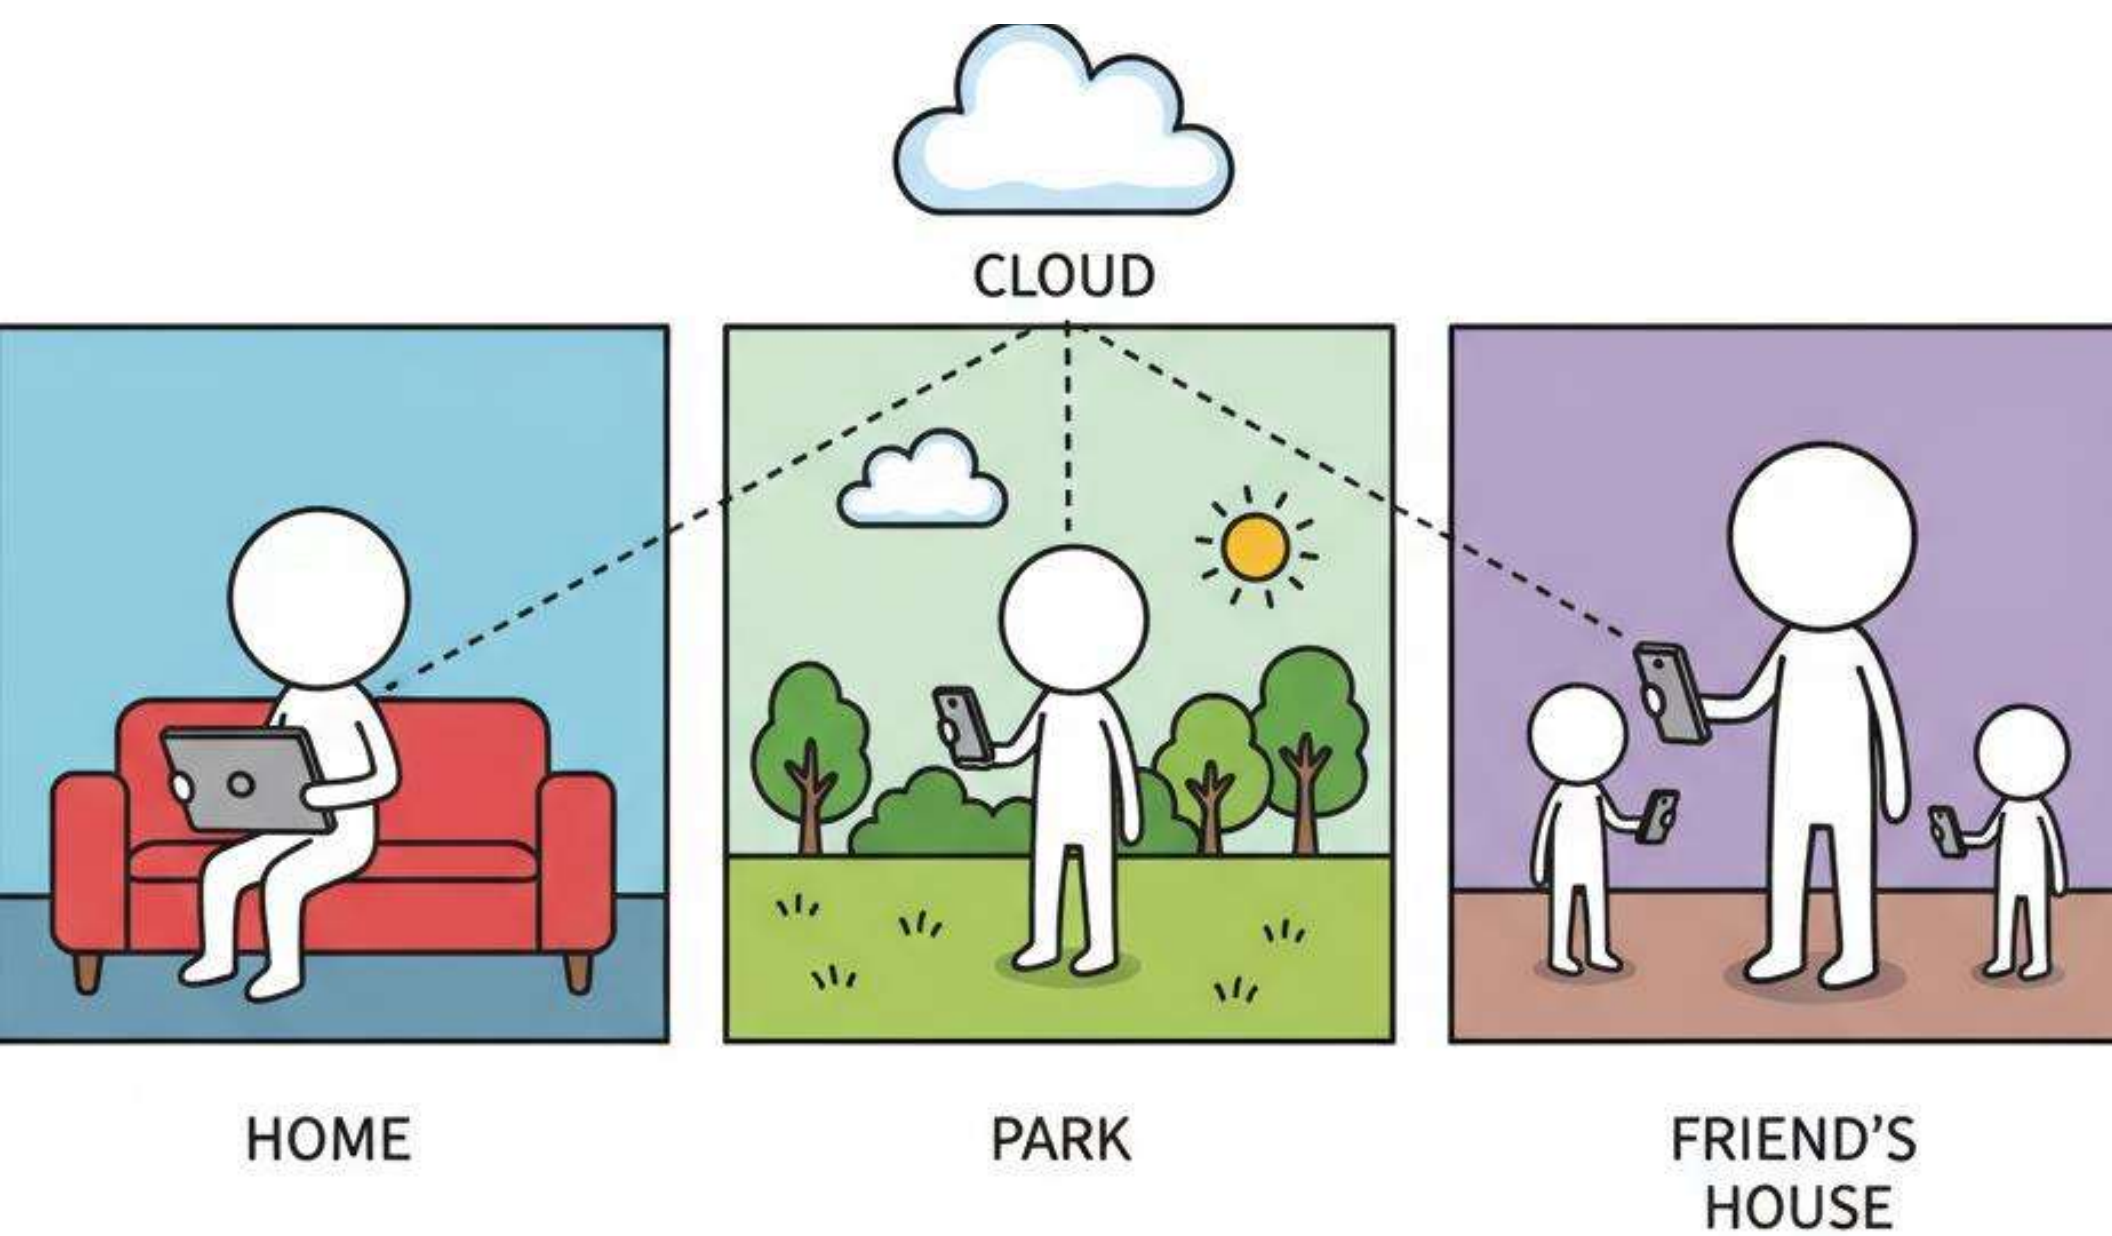

- You can see them anytime if you have internet

# Why is the Cloud Helpful?

- You don't need big storage on your phone 📱
- You can access files from anywhere 🧳
- Everything is kept safe with passwords 🔒

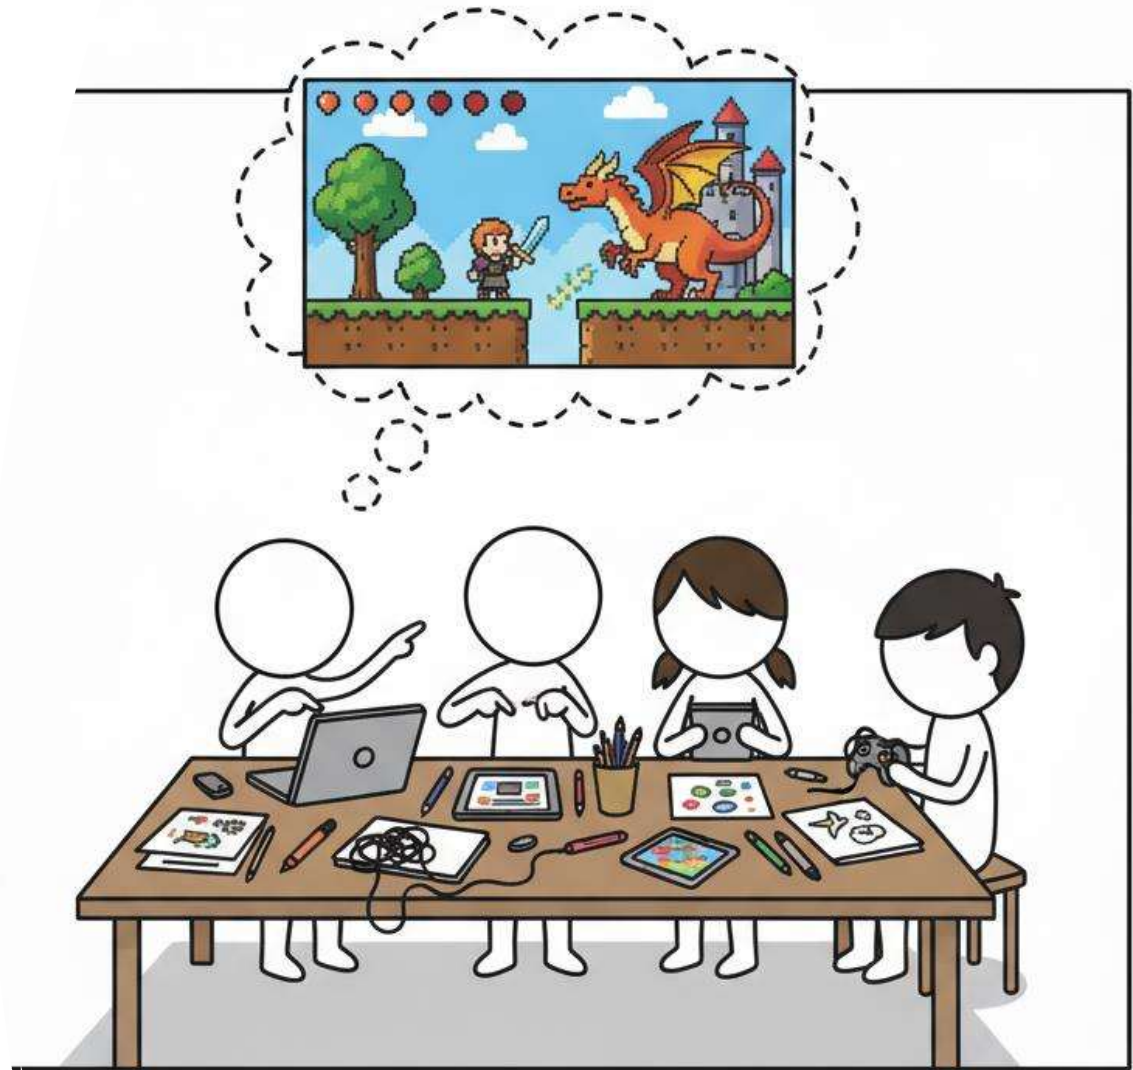

You can access files from  
anywhere

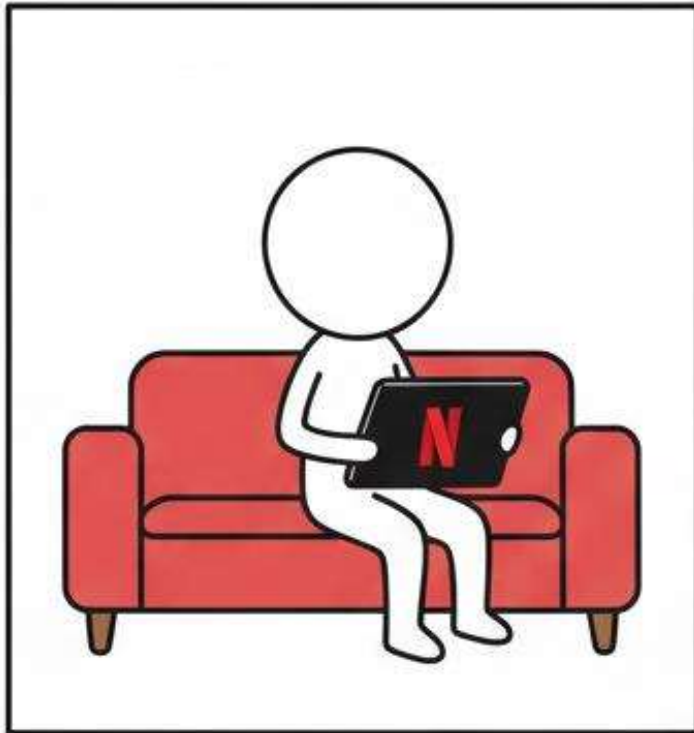

# Making games in the cloud

---

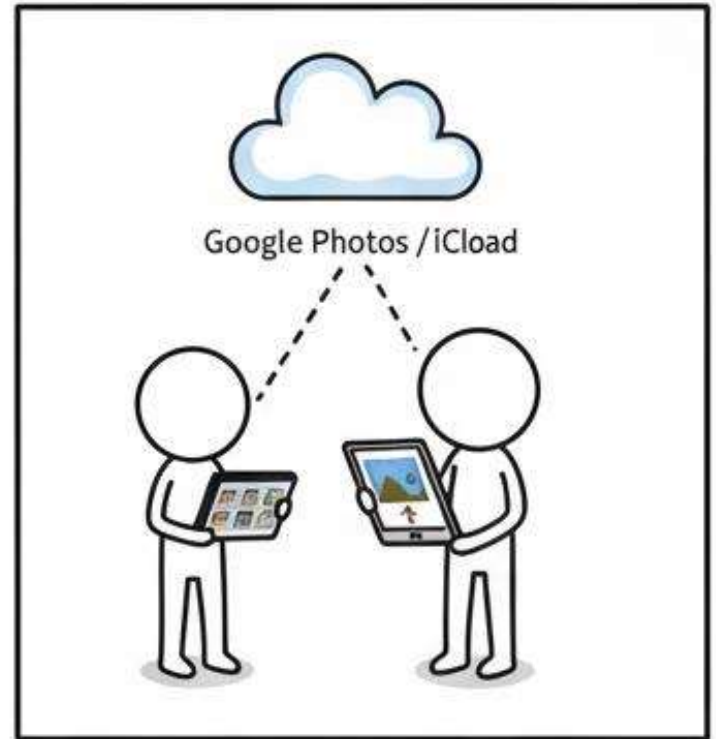

- Instead of each person using their own tiny computer, game makers use the big, powerful cloud computers.
- This helps them build super cool games faster and share them with everyone.

CLOUD STORAGE

Real-life cloud examples

# Cloud is Like a Magic Box!

- The cloud stores and shares our stuff 

- It's like a magic box you can open anywhere 

- Safe, easy, and always available!
